

I have worked in education for virtually the whole of my life.

I am a qualified teacher and an Educational Psychologist of some 33 years experience. Prior to my retirement from full-time work I was the Principal Educational Psychologist for Trafford. Consequently, I have developed strategy, managed budgets and personnel, fully realising the need to deliver value for money, whilst retaining and developing quality of service for children and families.

As an Educational Psychologist I do have a wide understanding of children and particularly those who have Special Educational Needs. All children should be included in all forms of life by helping to ensure their mental health and welfare are at the forefront of our teaching.

I have lived in the Winsford area for 5 years.

I became a governor at Darnhall Primary in May 2019 and hope I can contribute and add value to the range of experience already available within the governing body.
